

STUDYTRAX™

- 1. Build It** Setup the forms and data collection schedule for your study or patient registry.
- 2. Run It** Manage study events and workflow, and capture data from subjects, staff or other systems.
- 3. Publish** Facilitate analysis and automatically publish and deliver end-results to users, subjects and the academic community.

StudyTRAX is the only EDC to completely integrate study management (e.g., create forms, run a study, collect data) with the process of generating all types of academic output (e.g., grants, manuscripts, presentations, book chapters, posters) and thereby dramatically increases investigator productivity.

- › **Publish Faster**
- › **Integrate Clinical Care and Research**
- › **Increase Productivity**
